Editor's Notes

Attention is drawn to the two centre pages of this issue. Reprinted, with permission, is an article by U.S. sporting writer Dick Miller, as published in May, 1970, issue of "Guns" magazine in U.S.A.

The decision of I.M.I. Australia Limited to seek usage of this U.S.A. article for publication to Australian shooters is welcomed.

Many laws throughout the various States of Australia are similar yet vary in some degree or other and steps are being made to have uniform interpretations.

Concerning firearms — 1. Some areas limit gun handlers under supervision, to a minimum 14 years of age and gun ownership to a minimum of 17 years. Clubs are advised that advertisements or notices should not mention any young shooters, under the present State legal ages, who may win any large event. A prominent gun club President recently had a visit from the police, asking why a 15-year-old was allowed to shoot although the legal age for the area was 17.

2. Current import requirements concerning the **entry or re-entry of firearms into Australia** are as published on Page 2 of June, 1970, Clay Target Shooting News.

However registered clay target shooters may achieve immediate clearance of their firearms providing:—

(1) That for **Australian** registered shooters, the firearm has been in his possession in Australia and that a current A.C.T.A. handicap card is produced with the firearm to the customs.

(2) That for **visiting** shooters from overseas, that a current (e.g., British, New Zealand, U.S.A., etc., issued) handicap or membership card is produced with the firearm together with evidence of proposed participation in an approved shoot or shoots in Australia. The firearms are to be exported within a reasonable period and the importer may be required to give an undertaking to this effect.

Skeet shooting is becoming more popular and a number of clubs are establishing skeet layouts.

A.C.T.A. rules are quite clear to follow and the handicapping method is simple in that by an eighth

round of skeet a shooter has established his handicap for the next four skeet rounds. His skeet handicap is then self-adjusting at the end of each successive fourth round BUT, the club conducting each round **MUST** have the event recorded on the shooter's handicap card.

One prominent club requires its skeet shooters to lodge skeet handicap cards with the scorer at station number one. At the end of the round, from the skeet scoresheets, the scorer transfers each competitor's score (all his "kills," i.e., his off the gun score) onto the shooter's skeet handicap card record. The shooter then adjusts his own continuous recorded handicap figure with the approval of the referee and scorer. The scorer notes this final figure for the club. Thus the whole procedure relieves club Secretaries yet all concerned have full records of the skeet round that has been conducted.

Shooters and officials must remember at all times that:—

1. Off the gun scores are applicable to open skeet championship shooting — (Rule 127).

2. Handicaps are applicable only (a) in graded skeet championship shooting for determining grades — (Rule 128). (b) Straight skeet handicap events — (Rule 128).

(e.g.) shooter A = $23 + 2$ (or more h'cap) = 25.
shooter B = $25 + \text{Nil h'cap}$ = 25.
shooter C = $24 + \text{Nil}$ = 24.

But in shoots-off for trophies, in the second or other round, when the handicap is used, the shooter drops out. A shooter's full handicap may only be used once throughout one, or over, several skeet rounds comprising the one event — (Rule 133).

Note, however that club handicap events may be conducted under club local rules.

(c) Skeet sweepstake events (sweepstakes are usually compulsory division — Rule 132).

3. Skeet scoring cannot be unfair to any skeet shooter.

EDITOR'S NOTES — Continued

The trap handicap method recommended last year is even more simple than the skeet method and is being recorded by several clubs in addition to the existing trap handicapping formula. The recommended method under consideration is readily understandable, and over a period, shooters automatically move into or remain at a particular yardage or grading. The method is used by trapshooters in America and now in Britain.

In New Zealand — The 1970 South Island Championships will be conducted at Invercargill on November 14 and 15, 1970.

The 1971 North Island Championships will be conducted at Hawkes Bay Central Gun Club at Hastings on February 21 and 22, 1971.

Ian Ballinger of the Belfast Gun Club (NZ) has just been awarded the Lonsdale Cup for his shooting performances at Mexico City. This cup is awarded for the outstanding performance of the year to any sport on the Olympic or British Commonwealth Games calendar. The award is made by the Olympic selectors and ranks high in the order of New Zealand's sporting awards. This is the first time a shooter has been selected and one of the few times it has been awarded outside the track events.

Winchester Western Clay Target Tournament

The sponsors, Winchester (Australia) Pty. Ltd. of Geelong have proposed that this next tournament shall be conducted at eighteen separate host clubs throughout the Commonwealth, during the period August 1970 to March 20, 1971. The selection of venues has been designed to attract and provide for all interested shooters in three grades.

The trap events shall be of fifty targets off 16 yards and front markers, mid-markers and back markers may compete in any, or even all, of the separate venues with the only provision that any one shooter is limited to one first trophy in any grade.

Cartridges shall be of individual choice of either factory or home loading of 1½ ounce of shot, with no shot size larger than number 6.

Three trophies are to be won in each of the three grades (21-27, 16-20, 12-15) at each of the 18 locations.

Scores (long run breaks) achieved at each club in each State shall be compared and the highest recorded State Long Run Break shall be awarded a return air ticket to the 1971 Australian National Championships to be held at the Brisbane Gun Club, Queensland during June 1971.

These six State High Gun winners shall shoot, as a squad, at the Brisbane Gun Club on Friday, June 11, 1971, at 100 targets double barrel, kills to count, to establish the overall winner of the 1970/1971 Winchester Clay Target Tournament, using free Winchester shells. This squad of State winners shall be announced in May 1971, A.C.T.A. Shooting News.

Separately a fifty target (two rounds) skeet event shall be conducted at one venue in each State. (Details September News).

Complete details of the trap and skeet sections of the tournament are listed on page 7 of this publication.

Dear Sir,

"An Enjoyable Country Shoot"

On the weekend of May 16 and 17 I attended the Roma Gun Club annual shoot. Roma is 320 miles west of Brisbane but, with modern day, light aircraft, this distance was reduced to a two hour trip each way. With Queensland Executive Member Bill Edwards as our pilot and Winchester's Queensland Sales Supervisor Les English, we took off from Archerfield Aerodrome at 8.15 a.m. on the Saturday (after being delayed for two hours by dense fog).

A leisurely two hour trip over some beautiful Darling Downs country and we were in Roma and in time to shoot in the first event. The shoot was well organised by the Roma Committee under new President Richard Dean.

We were entertained on Saturday night at the Calcutta Dinner and invited to spend the night with the "Deans" on their property "Avenel" outside Roma. After shooting on Sunday we left Roma and landed back at Archerfield just before dark, with pleasant memories of a very enjoyable weekend of clay target shooting.

Dear Mr Berry,

Last weekend I visited Condamine (147 miles from here) for the two-day shoot. It was a most successful weekend and the club are to be congratulated on a most well conducted shoot. They have moved to a new site at the Golf Course and this is a big improvement on the old site.

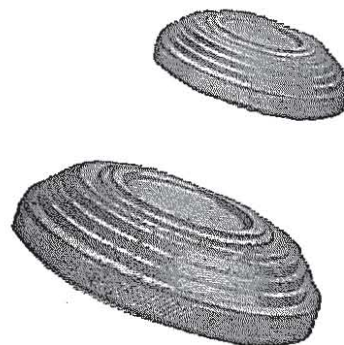

They did not have a registered Referee in the club. I put three through their paces and are attached. All three had no difficulty as they had done a lot of refereeing at club shoots for years and were quite proficient.

Yours sincerely,
BERKELEY BLOXSOME.

(Editor's Comment — nice to hear of such good club standards from such an active and responsible Referee Examiner).

How robust are you? A U.S.A. medical practitioner who has shot skeet for many years believes "that the hammering one takes from 100 rounds of 12 gauge shotguns is about the same as a boxer absorbs in an average round in the ring." (With acknowledgments to "Gunshot" of New Zealand and Doctor H. C. Rosenstiel of Fresno, California). — **Editor's Comment:** Do we thus have punch drunk elderly shooters?

Hopetoun (V) — 25/6/70 annual meeting elected as office bearers Messrs President, E. A. Poulton; Snr. Vice-Pres., L. E. Puckle; Jnr. Vice-Pres., L. Ey and R. Neville; Hon. Sec., A. R. Hudson; Assist. Moree (NSW) — Vale Messrs Len Jones and Reg Morley.

Len Jones of Milton Park, Moree was a great Moree Gun Club worker for many years and is greatly

missed by the members. He was a willing helper whenever and wherever help was needed in the affairs of the club.

Reg Morley was at one stage, Secretary and although ill health in recent years kept him away from many shoots, he will be remembered as a staunch supporter of Moree Gun Club and willing helper when help was needed.

Sydney (NSW) — had their first shoot at the new grounds at Heathcote on June 27. A new cement block building of 42 x 18 feet will house office and canteen. New club grounds on Heathcote Road, near Lucas Heights Reactor, one mile from Menai turnoff, has two traps and new clubhouse under construction. Club shoots Aug. 22, Sept. 19, Oct. 17, No. 14, Dec. 5.

Time Magazine dated March 23, 1970, under "America the inefficient."

1. That with the mass production of cars, U.S. efficiency became recognised then when computers arrived, the ultimate had been achieved BUT, recently a computer was wrongly told that a man was dead, so, for the computer's sake, the man's credit card was sent for and torn up, never to be permitted again.

2. Motorola now produces colour TV sets in which the basic parts are tucked into a pullout drawer — a serviceman can slide out the drawer and replace the faulty parts without hauling the whole set into his shop. In addition, manufacturers could spend more on improved quality and less on annual model changes. "Planned obsolescence," says Henry Ford II, "is out of the window."

Horses for Courses

by Mr Ian Cook, Works Manager of
Australia's largest sporting ammunition
factory.

One of the better known racing adages is "Horses for Courses." I understand that this suggests that certain horses seem to run their best races on a specific course. I don't propose to enter into any discussion on this matter, but I believe that a similar situation exists with guns and ammunition.

For instance, take a simple case of misfires in rimfire ammunition. The table below summarises the results obtained by firing 100 rounds of four different sorts of ammunition in each of six different rifles and then recording the number of misfires in each test, e.g., Cartridge B in Rifle 1, gave 9 misfires in the 100 rounds fired, while Cartridge D in Rifle 5, gave 19 misfires in the 100 rounds fired.

	Cartridge				Total Misfires in each Rifle
	A	B	C	D	
Rifle 1	—	9	15	2	26
Rifle 2	31	13	21	29	94
Rifle 3	—	11	22	4	37
Rifle 4	5	3	5	1	14
Rifle 5	9	23	10	19	61
Rifle 6	—	3	—	4	7
Total Misfires in each Cartridge	45	62	73	59	

I should explain that although the cartridges are "normal," the rifles were specially selected for this test because of their tendency to give misfires.

If you study the table you will notice that Cartridge A gave no misfires in three rifles, yet it was the worst of the lot in Rifle No. 2. Rifles 4 and 6 have the least number of misfires overall and although Rifle 4 has more misfires with Cartridges A and C than Rifle 6, with Cartridge D the situation is reversed.

There are other interesting facts you can deduce for your own interest, but the point which emerges is that the combination of rifle and cartridge has a significant effect on performance.

Another area in which the same situation applies is the effect of different combinations of rifle and cartridge on accuracy.

Before presenting the results, I should point out that in testing accuracy we hold the rifle in a vice-rest (see the photograph) and fire a ten shot group. We then express the size of the group as the size of the

smallest circle which encloses the centre of the extreme shots (see photograph). In each test we fired 5/10 shot groups of each cartridge in each rifle.

In this series of tests we took five different types of cartridges and fired them in nine different rifles. With each type of cartridge we tested two different batches, to give a more representative sample. The tests were fired over a range of 75 yards and I have recorded the average group size. Incidentally, all the cartridges were Long Rifle High Velocity of normal field shooting standard.

All sorts of conclusions can be drawn from these results. Look at **Cartridge A, Batch No. 2**. In Rifles No. 2 and No. 7 it performs very well, but is quite hopeless in Rifle No. 1.

Cartridge A, Batch No. 1 gave the best result in Rifle No. 7, whereas Batch No. 2 gave almost the worst result in the same rifle.

Rifle No. 1 performs quite well with most cartridges but is very bad with Cartridge A.

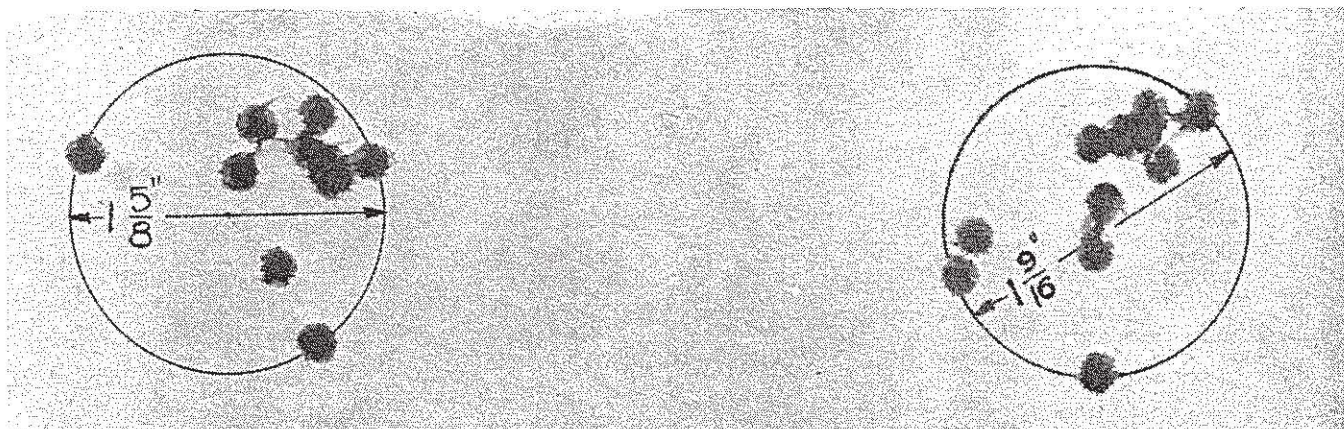

The average of each cartridge in all rifles varies between 2 9/16 in. and 3 7/16 in., but the average of each rifle with all cartridges varies between 1 7/8 in. and 4 3/4 in. This leaves little doubt as to where the cause of the variation lies.

Once again I will leave it to the reader to make his own further deduction, but I am sure you will all agree that there is some degree of correlation between the cartridge and the rifle, as far as accuracy is concerned.

The other point I would like to mention briefly concerns handloading of shotgun cartridges. The two major manufacturers within Australia supply "matched components," i.e., Primers, Powders, Wads and Shot. They recommend loads using these matched components and leave it to the shooter's discretion to observe the recommendations.

The following tables show results obtained with a variety of Primers and Powders loaded under **controlled** conditions. This involved **hand weighing** of powder and shot, although the loading was done on a normal hand loading machine.

As I consider this subject as a matter of some importance I will quote two sets of results. The first of these refers to tests carried out with seven different

types of Primers and one imported Powder which is not used by local manufacturers.

The pressure results are quoted in tons per sq. in., and the velocities are the average given in feet per second over 20 yds. All results are averages of 10 shots.

Primer	Pressure (t.s.i.)	Velocity (f.p.s.)
A	2.96	1029
B	3.07	1026
C	3.79	1073
D	2.81	1015
E	3.23	1035
F	3.55	1079
G	3.69	1078

The variation in velocity is such that I would only regard samples C, F and G as satisfactory. The others are far too low.

On the pressure results the same three samples are getting too high. (The English Rules for proof specify an average of 3.25 t.s.i. as an acceptable maximum for 2 3/4 in. chambered guns). High pressures of course can lead to burst guns, this proving an expensive sort of experiment.

In the table below I have shown the results obtained with three different Primers and three different Powders. Pressure and velocity are expressed as previously, A, B and C Primers were the same as used in the previous test.

Primer	Powder No. 1		Powder No. 2		Powder No. 3	
	Pressure (t.s.i.)	Velocity (f.p.s.)	Pressure (t.s.i.)	Velocity (f.p.s.)	Pressure (t.s.i.)	Velocity (f.p.s.)
A	2.40	1088	2.58	1072	2.99	1017
B	3.13	1166	3.06	1101	3.02	1039
C	3.74	1198	3.91	1149	3.63	1066

Note the effect of combining Primer A with Powder No. 3. See how the pressure increases significantly in comparison to Powder No. 1 and No. 2. Now note that with Primers B and C and Powder No. 3 the pressure drops in comparison to Powder No. 1 and No. 2.

You should also look at the differences in velocity. These are partly due to pressure differences, but it is obvious that Primer A has less effect on velocity than the other Primers.

I have only quoted a few results, but hope that I have made the point that when one starts fiddling with different components the results can be quite variable. In short — matched components are like "horses for courses" — at least you start off on a good thing.

Clay target shooting promotion

80 Walker Street,

June 2, 1970.

The Secretary,
A.C.T.A.,
Melbourne.

Dear Sir,

I have just read with interest the report from the Brisbane Gun Club regarding "Promotion of Clay Target Shooting."

The Lismore Club was thinking of running a day such as this before hearing of the one run at Brisbane. After hearing of the success which they had our Club went ahead with the idea much to our pleasure.

We had 13 try their hand, with nearly that many watchers. Two have registered already, with two coming back to our next shoot. Apologies were received from four others.

Emphasis was stressed on the fact that any person over 16 years of age would be given a shot whether they intended joining the club or not. The time needed to let all have 10 shots each was a little over two hours, which seemed a long time, but safety was the keynote all the time—with one man, one gun at one time. This gave the others a chance to watch the stance corrections for others. Two joined in the club shoot in the afternoon and three watched.

We were so pleased with the day that it will be on again when arrangements can be made.

Club members are to be thanked for loaning their guns and donation of cartridges.

Yours faithfully,

R. D. SHEPHERD,
Hon. Secretary, Lismore Gun Club.

Year 1951 — Team of three from Queensland, one from New South Wales. Left to right: Syd Lamb, Jim Smith, Newton Thomas, Keith Cameron.

The above three photographs record a teams match conducted as part of the ACPTSA (Australian Clay Pigeon Trapshooting Association) International series annually at Burwood, Victoria.

Teams were pre-determined and nominated then shot in conjunction with the Australian Champion of Champions event.

Shotguns used were two Browning automatics, one Browning Under-and-over (still in use 1970 by Newton Thomas) and one Boss Side-lock Double Barrel.

In this 1951 programme, Newton Thomas used this new Browning under-and-over shotgun number 20447 for the first time and shot the first 100 straight targets in the Mackintosh Trophy International Event and went on to establish an Australian clay target record of 183 straight targets.

Webster, 27/30.

Attendance was down on last year owing to other sporting and social functions over the long weekend. Visitors from Bourke, Ballon, Cunnamulla, Dubbo and St. George.

The feature of the shoot was the outstanding shooting of Des Cosgrove, of Warren, who shot 495 tgts. straight. Des was unlucky not to break the State record (518), but his shooting is all the more meritorious when it is considered that early in the day his gun blew up, and that most of the break was shot using a type of cross-bred gun, consisting of Des's barrel screwed on to Gordon Rich's action and stock. We were also plagued with trap breakdowns, which doesn't do anything for a shooter's peace of mind.

Congratulations to Andy Schneider and John Small, who passed their exams for their referee's badges.

The Club wishes to thank the office staff, Dadie and Max Overton and Jack Durock, without whom we would have a battle to keep going; Col Harding, for running the bar; Bill Manson and the Central School Mothers' Club for the lunches and teas; the Committee of the RSL for the use of the Auditorium for our annual dinner; Angelo Pippas, for the tasty spread he provided, and all who helped the Club in any way.

Special thanks to Wulf Reichler and Denis Hunt for assistance in our trap troubles, and also to our trappers, Jack Coffee and Colin Grant.

The H. McDiarmid Teams Trophy was won by Cunnamulla with a score of 80/100.

IMI high gun was won by Paddy Mitchell and Inter. high gun, donated by Val White, went to Howard O'Connor. (John M. Ryan, Hon. Sec.)

The Club DB C'ship was decided over the longest shoot-off in the history of the club, with Bevan Daley and Don Scowcroft slugging it out with equal determination. Daley heavily dusted his 143rd target with both barrels but failed to score a "kill," and Scowcroft made no mistake with the next target to add another championship to his impressive record.

Glen Baker, from Kempsey Club, shot well to win High Gun for the day, closely followed by veteran G. D. T. Seccombe.

The surprise of the day occurred in the 20 target handicap when two youngsters, T. Hodge, of Albury, and R. Renshaw, of Rutherglen, shot the possible ahead of a classy field.

(C. J. Blackshaw, Hon. Sec.)

It was decided to run a \$30 cash event in lieu of our normal trophies, as it is felt that many shooters prefer to win money as it helps to defray costs.

The standard of Skeet shooting by members is rising fast. Club President, Ian Clarke, joined the select band by shooting a possible off the gun.

The Club secretary, Ray Morton, is applying the handicapping system strictly and its effect is noticeable in the better scores being achieved.

(P. J. Jenkin, Vice-Pres.)

This was the first competition for the Winchester Shield which is to be shot for quarterly as a three-man team's event.

Despite the cold, wet and windy conditions scores were high with many possibles off the gun.

Local shooter, Bob Boggis, shot a faultless fifty break but this was soon eclipsed by a classic shooter, Morrie Quirk. Morrie was presented with a nil handicap as a memento of the achievement.

It was good to see Bob Pryke get the front marker. Bob has been off ill for some four months, but look out for some scores now that he is OK.

The generation gap and you

PULL!

By DICK MILLER

WHAT RELEVANCE does the much-publicized generation gap have for the clay target sports? When I put together several bits of information I have picked up over the last thirty to sixty days, the generation gap, real or imagined, serious or minimal, seems to have a lot of relevance for the future of the clay target sports.

If the dramatic growth of trap and skeet during the soaring sixties is to extend into the seventies, the assumption follows that there must occur a continued input of live bodies into the games. From where do we get the live bodies? Will all of the new trap and skeet shooters come from the much-maligned ranks of the over-thirty generation? For economic reasons as much as any other, it does follow that most new trap and skeet gunners will be over thirty when they take up the games and become active club members.

But, what happens if the under thirty generation completely rejects guns and shooting as a way of life or a form of recreation? It would then seem that the growth of clay target competition would face a downward curve. If the mores and attitudes of the under-thirty group remain constant until and after they cross the magic natal anniversary which is supposed to give them a changed outlook on life, we might be in trouble. I say

that we, meaning devotees of the clay target sports, might be in trouble for several reasons.

Early this year, I talked with a gun shop owner in the city of Berkeley, California. His shop is located a few blocks from what is admittedly one of the most liberal and activist campuses in the United States. He said that his business with the established shooter and hunter in 1969 was as good or better than it was in the record gun demand year of 1968. But, he said his Christmas gun sales were the worst he had experienced in twenty years of business.

The reasons he gave for the drop in his 1969 Christmas sales get at the crux of our problem. He said that a number of parents had been in the shop looking for appropriate gun gifts, but had returned later and reported that they had learned that the kids were simply not interested and did not want guns at all. One parent did buy his son a gun, gun case, and cleaning kit which was placed under the tree on Christmas morning. When the boy opened his gift, he screamed that this was an immoral and obscene gift, refused to open the rest of his gifts, and stormed from the house for the rest of the day.

There are a lot of conclusions you can draw from this situation or from the behavior of this boy, but one of

them has to be that this boy, and any like him, are not likely to take up trap and skeet later in this decade. At least, the prognosis at this stage is not good. Because it seems to me that it is not only futile but foolish to view with alarm unless you are willing to suggest an alternative or remedial action, I share some thoughts with you who cherish the games of trap and skeet.

I wrote last month's Pull column which describes in some detail the trap and skeet programs being conducted in the nation's colleges by the Association of Student Unions before I visited Berkeley and picked up the bits of information just described. I will concede for the record that not all colleges are so ultra liberal as Cal in Berkeley, nor do the communities in which they are located nourish the sort of violent anti-gun attitude which thrives in the Berkeley climate but I also offer the conclusion that Cal and Berkeley are neither alone or unique.

This being the case, it becomes even more important to support all of our collegiate shooting programs (such as the excellent one at Indiana University) with a lot more vigor than we are now doing. It seems to me that this problem of attracting new shooters being faced by the shooting game is not one we can sweep under the rug and say that we will face it when it becomes epidemic. In my judgment that will be too late. We must now with any program that is signed to forestall a crisis in the seventies, or eighties.

If the conclusions I have reached are true, (and these conclusions are supported by a number of knowledgeable people in the game) gun club members can wait for the new young shooter to show up at the club via a process of natural selection

IMI Australia Ltd. is constantly looking for ways to introduce more people to clay target shooting, that's why in the interests of the sport we use our normal advertising space to reprint this article from 'GUNS' Magazine (U.S.A.).

clubs, state associations, and national associations must put into operation some sort of sustained program to attract young people to the clay target games on a regular basis.

There are all sorts of possibilities along these lines, and almost any of them can make some sort of contribution to stimulating interest. We are told, and observe, that young people are followers. If we can get their leaders to decide that trap and/or skeet is the "in" thing, we ought to be on the way to success. How can we do this? A gun club could, for example, announce that a free shooting and instruction will be offered once a month (or week, depending on resources) for any of several groups, such as class officers, all honor students, athletes scoring the most points in any game, or being selected the athlete of the week, or being named to any sort of honor team. All students winning scholarships in a local area could be the guests of the club for a day of trap or skeet.

The criteria for this kind of approach are endless, and can be tailored to fit any local situation. Club facilities could be made available to any school group for an extra-curricular club organized for shooting. State associations could promote a state championship in trap or skeet with entries solicited from every school in the state. This event could be staged as an extra day or extra event in connection with any and all state tournaments. Winners could go on to compete in either the Grand or the NSSA skeet nationals.

I'm sure that individual shooters can do more than they have been doing to expose more young people to the fun of trap and skeet. How many kids of neighbors, friends, relatives, etc., have you invited to the club at least once?

Some readers will be sure to comment that all these suggestions are worthwhile, but whence cometh the money? Benefit shoots are conducted for just about every cause you can think of. What is a more worthy cause than insuring the continued good health of the shooting sports? One dollar more added to the entry fee of any state or national shooting event would not turn away any shooter, but the total dollars so acquired would provide the bread for a lot of the programs I have suggested (and there are many more possibilities than I have mentioned).

There is another prime possibility for changing or molding the thinking of young people with respect to the shooting sports, and that is the burgeoning concern for ecology, which does "turn on" many of the young student activists. During my years with SAAMI, I attended an Outdoor Education Project workshop at Purdue University in Indiana. One of the professors told the workshop that he was personally opposed to hunting and shooting, but that his concern for conservation of our natural resources had demonstrated dramatically to him that only the constant demands of hunters and shooters for places to hunt and shoot had saved serious deficiencies in our water table and other ecological considerations. He admitted that only the revenue obtained from the 11% excise tax levied on guns and

ammunition via the Pitman Act had saved many conservation programs from utter disaster.

Shooters today have never had a more perfect opportunity to constantly remind the ecology activists that the funds generated from our "doing our thing" have made it possible for them to enjoy forests, wetlands, lakes, rivers, and parks for ten or eleven months of the year while we ask only a month or so in return for our very substantial investment and contribution. And, we should not miss a chance to shout from rooftops that all the ammunition we consume at gun clubs generates a lot of revenue for their pet projects with no competition at all from us for the resources.

It is a known fact that you can't often reason a person out of an idea he holds as a result of prejudice, because prejudice is based on emotion rather than reason. But, you can sometimes make progress with such a person on the basis of a conclusion that you share in common, and that's where the contribution made by trap and skeet shooters to preserving our natural resources comes in.

There is a lot we can do, individually and collectively, to keep our clay target games healthy. The time to begin is now. Tomorrow may be much too late.

The third round of the Budge Shield Team Shoot provided a record attendance for the Morwell Club. In the main event 23 shot the possible 15/15 and in the ensuing shoot-off Maurice Kenny shot well against tough opposition to win the event and also a 75 break badge.

The team scores after the third round are: Bairnsdale 210, Morwell 209, Korumburra 208, Sale 205, Foster 204, Yarram 202, and West Gippsland 195.

The Tower event finished up in the dusk and the Red Cross novelty event was cancelled.

(W. T. Pryde, Hon. Sec.)

MYAMYN, 30/5/70.—Weather conditions: Fine and mild. Attendance: 40. Results: Club DB C'ship Shoot-off: 17 shooters scored possible 15 targets. First, R. Mitchell, Melbourne, 35/35; second, P. Neyland, 36/37; third, R. Millard, 35/37. F/M: C. H. Rundell, 14/15. A. & H. McSween Shield Shoot: Seven teams completed. Myamyn team winners from Hamilton and Tyrendara with scores of 68/75 points.

Myamyn Club conducted a most successful shoot to mark a special occasion when a new layout of tracks and trap-house was used for the first time. The automatic trap used was a presentation from the Cavendish Club—having closed down their activities.

The President thanked former members of Cavendish Club and said he had not heard of such a gesture of fine sportsmanship.

The head-on breeze made targets tricky to shoot, but many visiting shooters praised the new set-up.

(Joseph J. Wallis, Hon. Sec.)

SEBASTOPOL, 27/6/70.—Weather conditions: Cold, raining, gusty wind. Attendance: 35. Results: No. 1—E/O 5-tgt. Pts.: A. James, N. Paterson, W. Abbott, M. Pascoe, A. Shepherd, 15 points. points championship from Fred Reade and Ron Evans. Tony Cauchi is showing improvement and deserved to win the Front Markers' Championship.

In the 20-tgt. h'cap four shooters divided, so it seems that the cold and fog didn't make too much difference. (J. Platten, Hon. Sec.)

High Gun: G. Parker, 81/85.

We started off with such a miserably wet day that it was a wonder anybody turned up at all.

Ray Slawson was also "A" Grade winner in the Performance Handicap; however, he had to shoot off fifty targets against George Parker before it was conceded to him. George's efforts, though, added to High Gun at the end of the day.

This time the Brampton Island event went to front marker, Tom Pascoe. Hugh Donald, front marker, is shooting well.

(E. Mackey, Pub. Officer.)

Hogarth, 10/10; 2nd, J. Mott and T. Soames, 9/10.

High Gun: M. Gough, 59/60.

Everything was fine at our shoot this month; conditions were almost perfect, and we had a good crowd, including many visitors, and we also welcomed a new member, Ross Mackay.

Scores were high in the South-East Queensland DB C'ship, with eleven possibles in the shoot-off won by George Parker. Martin Gough, second, also made a "150 break," and finished with High Gun.

More congratulations went to Adrian Yannucelli, who began his day by winning the opening points event and then cleared "the shooter's hurdle" — his first "50 break."

Heat No. 4 of the Brampton Island Holiday went to Alan Kemp, and it is still anybody's guess who the winner will be.

(E. Mackey, Pub. Officer.)

Intermediate High Gun won by M. Ryan, Chinchilla.

Best 12 to 16 yards in the State SB event was won by local President Bob Parr.

Fifteen-year-old Malcolm Thornton from Dalby was the star of the second day of the two-day shoot. In a field of 57, which included many of the State's top shooters, he won the State SB title. His father, Athol Thornton, well-known as a SB specialist, must have coached him well.

Mrs. Paget, of Ballandean, became the first lady shooter to shoot in competition at Mundubbera — and how! She shared in the \$500 handicap and lost yard.

New local shooter Barry Keune out-shot a good field to win the points event.

KATANNING, 31/5/70.—Over the long wet weekend outdoor sports were enjoyed in inverse ratio to the indoor variety. The field was good and the light was poor so there was time only for one complete round of skeet.

For the D. Anderson trophy, Scotty Gibson, Tim Catling, Tony Nesci and John Downer all qualified for the shoot-off by exceeding the possible 25 with handicap added, and after a lengthy shoot-off under the new rules, finished in that order. Tim Catling shot an off the gun break of 54 and was also high gun for the day for the second shoot in succession.

Dave Ryall, of Kojonup, was in excellent form and having shot his first 25 skeet break in the qualifying round, went into the visitors shoot-off a hot favorite. He shot true to form in the bleak conditions and finished first ahead of Frank Buemi, Laurie Knapp, and David Webb, with his personal best skeet break of 35.

(D. G. Anderson, Pub. Officer.)

KATANNING, 14/6/70.—Shooting conditions were pleasant Sunday. Twenty-five mixed targets for the Evan Pedler trophy. Sandy Leach 22, Mike Crossley 23, and Jim Moore 19, all exceeded the possible with handicap added, and after shoot-off finished in that order.

A 10 walk-up sweepstake was won by Norman Rae, 10/10, from S. Leach, 9/10, and Bill Coleman and J. Moore each with 8/10.

The high gun was won by Tim Catling for the third consecutive shoot, 32/35, followed by Scottie Gibson and M. Crossley each 31/35.

The teams' match resulted in a win for Captain Pedler's team, 265, to the Vice-Captain's team led by Tim Catling, 260. At the half-way mark the captain's team trailed by 7 targets and looked to be in some trouble, but they shot steadily in the final stages and after drawing level, drew away to win by five targets.

(D. G. Anderson, Pub. Officer.)

KATANNING, 28/6/70.—George Anderson gave the other shooters a lesson on how to handle windy conditions when he was a clear winner in the 30 SB event. Shooting for the Greg Downer trophy in conditions that caused some alarming gyrations of the targets, he scored 28/30 to win by three targets from Scottie Gibson, Ross Ritchie and Ross Anderson, all on 25/30.

A 10 target DB points sweepstake which followed was completed in some showers of rain and wind and was shared by Ross Ritchie and David Anderson, 30/30, with Sandy Leach taking out third place, 27/30.

Ross Ritchie high gun for the day, 37/42, from George Anderson, 36/42.

(D. G. Anderson, Pub. Officer.)

NORTHAM AND DISTRICTS, 14/6/70.—Weather conditions: Fine, cool. Attendance: 14. Results: 10-Pair Double Rise and 10 Single Barrel.

As often happens at this time of the year, cropping operations kept many of our regular shooters from attending.

The outright winner was Perth Gun Club visitor, John Eddy, 26/30.

Brian Holtfreter scored 27/30 to win High Gun for the day. Second to John Eddy, and first among the

NORTHAM AND DISTRICTS, 28/6/70.—Weather conditions: Windy, cold, wet. Attendance: 21. Results: 10-tgt. DB; 10 Walk-up; 10-tgt. SR.

Conditions were far from ideal, but despite this a fair attendance at Island Farm.

Merv Madew won the day with an adjusted score of 36.8. He shot consistently from the beginning and left no doubt in anyone's mind as to the result. John Harris was second, with 31.6, and new shooter Graham Humphrey (that's right, another one) was well placed third with a gross score of 31.1.

High Gun was taken by John Harris with an off the gun score of 28/30.

Sunday's results have made an alteration to the aggregate. Merv Madew has moved into the lead. He now has 14 points, Les Levieme has 11, Dick Howell 10, Max Draper 8 and Geoff Boyle 7.

Congratulations to Dick Howell on winning the State Intermediate SB Championship at Geraldton on the 21st. From the stories circulating on Sunday from those who travelled to Geraldton for their "Championships" they have a particular brand of hospitality up there that has to be enjoyed to be believed.

The Steve Rogers Shield was convincingly won by L.E.G.G.C. by a margin of one point.

A deserved win to John Middleton in the Piri Trophy after shoot-off with Bill Lloyd. Both shooters tied with 18 targets each. A good effort under the conditions.

Chris Doutre chased Fred Rimmer along in the 16 yd. event and used very few second barrels until a left swinger called for the second tube and it kept on going. Both shooters shot 21 straight in this event. Bill Lloyd emerged High Gun winner over the programme. A large crowd attended the shoot and a barbecue was held later at the Club.

(E. Rimmer, Pub. Officer)

All events were keenly contested with Brookes, Pearson, Harvey and Seal making the pace.

The 20 Target Tower event was for a trophy generously donated by Frank Apted, of Glenroy, Melbourne, a member of the Victorian Gun Club. Frank attended our Easter tournament and was a tremendous help to our members.

Why Winchester makes two primers.

Simple really. Shooters who buy AA Target Primers do so, because they appreciate that these primers are factory-balanced to suit Winchester AA 440 Ball Powder and provide an ideal combination for their target shell

reloads. Shooters who buy Winchester Magnum primers buy them because they're unhappy with their reloads and feel they need an extra-potent primer to improve ignition.
Be a Winchester man forever.
